Instructions:

Please read the following instructions carefully before submitting this Hands-on Exercise:

- Use WordPress to prepare exercise solution.
- You may consult tutorials and videos if the concept is not clear.
- Your submitted exercise will not be considered/counted if:
  - It is submitted after due date.
  - It is not in the format of MS Word File (.doc,.docx)
  - It does not open, or file is corrupt.
  - It is copied (partial or full) from any source (websites, forums, students, etc.)

Learning Outcome:

After completing this exercise, you shall be able to:

- Respond to visitor's comments.
- Install theme and customize website.
- Add, update and delete menus.
- Add widgets in the sidebar

Problem Statement

Please perform these steps and take screenshots:

1. Upload or install any theme on your WordPress website (It could be your existing or new website)**.**
2. Create a website according to your choice.
    - Create pages for example Home, Blog, About, contact us etc. and show them as a primary menu on your site.
    - Add logo. Customize header & footer and use color to match with your logo
    - Edit some comments in your site, mark some comments as a spam and then disable comment feature in your site and make blog page as a static page on your site.
    - Add some widget to the side bar like recent posts and Facebook like box

Requirement:

MS word file (*.doc, *.docx) with following item:

1. Complete screenshots of all the steps involved in above task.
2. URL of website

How to take a Screenshot:

1- Open your website and click on “PrtScn” button, Open paint and click on paste button, then save the image.

2- You can install a screenshot software “Light Shot” then click on “PrtScn” button to take the screenshot.

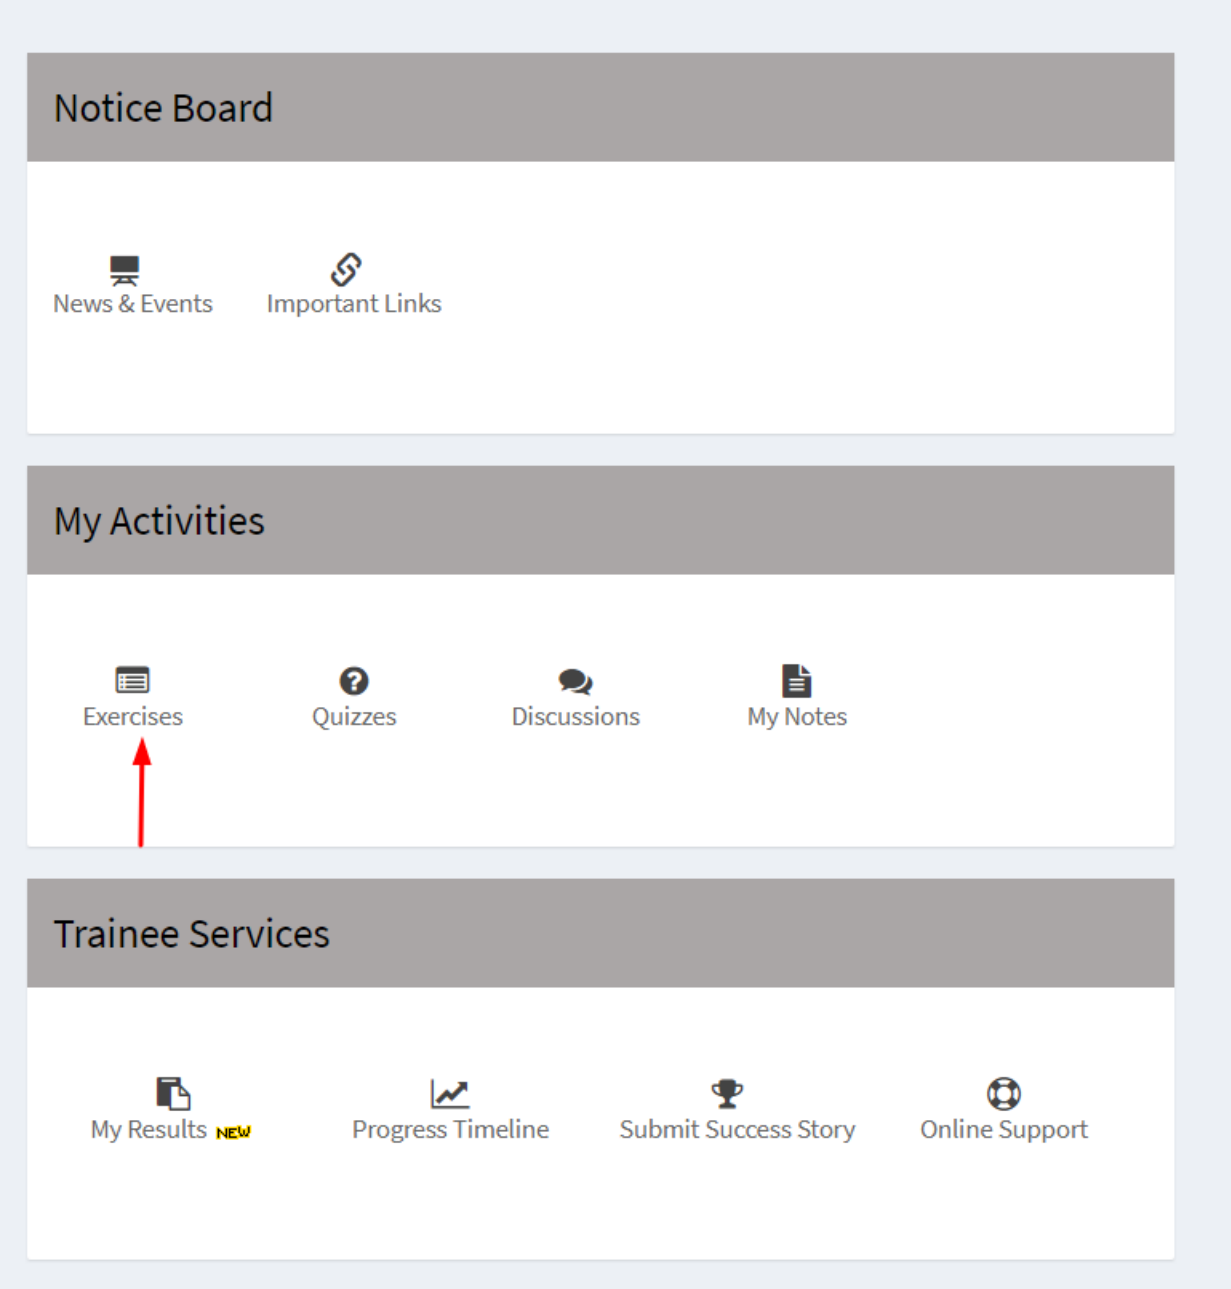

BEST OF LUCK ☺
